

A diver is shown underwater, wearing a blue and black jetpack. The diver is swimming horizontally, and a large school of fish is visible in the background. The water is clear and blue, with sunlight filtering down from the surface.

The World's First Underwater Jetpack

REDISCOVER...

Water

limitless,
effortlessly

Archie O'Brien
CEO, FOUNDER & DESIGNER

Cradle of all life on earth, oceans have seen the appearance of fearsome animals that are increasingly adapted to their environment. Among the marine species, the Barracuda is one of the fastest fish with a top speed of nearly 45Km/hour. Our underwater jetpack takes its name from this torpedo of the seas.

Beyond its exceptional performances, CudaJet is a real time machine, allowing you to rediscover the water element as naturally as if you were born there.

Securely fixed to your back, the jetpack becomes a natural extension. It gives you an unparalleled freedom and exhilarating sensation of diving in

"weightlessness" in all dimensions, without any comparison with the nautical machines that tow you. No underwater device has such natural maneuverability and such propulsive force in a compact design!

Rediscover unlimited water, effortlessly...
Take your place next to a Barracuda. 

Archie O'Brien

RETURN TO THE NATURAL STATE...

The marine world awaits

Whether you are an avid free-diver, snorkeler or scuba diver, diving with a CudaJet is a fascinating, unforgettable and totally new experience!

Simple device, perfect control

The jetpack is equipped with a perfectly ergonomic and easy-to-use remote control. Its micrometric trigger allows you to finely adjust your speed. All the important technical data (speed, thrust, depth, level of charge...) are displayed on a bright LCD screen.

BATTERY STATE

View battery life and remaining time for a full charge when the jetpack is charging.

LEAK INDICATOR

In unlikely event of a malfunction, the built-in computer sends you an alert.

DEPTH INDICATOR

Set the depth limit up to 40m. An alert is displayed, the controller vibrates and the logo lights up in red when the threshold is reached.

TEMP INDICATOR

The built-in computer continuously monitors battery temperature to get the most out of your CudaJet.

40Kg MAXIMAL THRUST

40m MAXIMAL DEPTH

40' POWER AUTONOMY

FLUID DESIGN
Reduced drag for optimized speed

13Kg LIGHTWEIGHT DESIGN

SMOOTH CONTROLLER
Gradual and micrometric

3m/sec INCREDIBLE SPEED

CLEAR & SIMPLE DISPLAY
Ultra-bright LCD color display

The harness, a human/machine interface carefully designed

The adjustable harness plays a crucial role in transmitting thrust to the user. Neither too flexible nor too rigid, it allows the jetpack to become one with you while preserving comfort and unparalleled freedom of movement.

Design & performance

Quality in every detail

The CudaJet is a concentrate of advanced technologies. At the heart of each machine are top-quality components selected for their resistance to seawater and a fearsome high-performance electric propulsion system. Finally, each jetpack is meticulously assembled by hand in England.

A unique feeling of weightlessness in 3 dimensions!

The value of life is not measured in quantity of goods, it is measured in emotions.

Models

CUDAJET JETPACK Silverfish

The world's first underwater jetpack was born in this classic and timeless silver livery. Our underwater jetpack provides an unparalleled feeling of freedom coupled with predatory maneuverability. Swim in weightlessness in a new underwater world.

CUDAJET JETPACK Tactical camo & marine camo

The tactical camo versions drastically reduce glare and breaking up the silhouette for stealth integration into the environment. These versions have been developed for the special forces for an improved autonomy and speed and are equipped with a rebreather.

PROFESSIONALS ONLY

CUDAJET JETPACK Black/yellow

The CudaJet Founder's Edition is a 20-piece limited edition in a dedicated black and saffron yellow finish. Each underwater jetpack is numbered on both the thruster and the harness. Each jetpack comes with a certificate of authenticity.

LIMITED EDITION ONLY 20 MADE

CUDAJET JETPACK Lifeguards

Cudajet and Bünkl motors have developed a specific version for firefighters and sea rescuers. This version sports a recognizable fire-red color and high visibility reflective strips.

PROFESSIONALS ONLY

CUDAJET JETPACK Event horizon black

Originally intended for jet fighters camouflage to eliminate any reflection, here is the ultra-exclusive version of our jetpack in absolute deep black. This patented coating is made of carbon nanoparticles that absorb 99.96% of visible light and make it perfectly black even in bright light.

LIMITED EDITION ONLY 10 MADE
